

**Bronson Potter Homestead & View trails, Walter Valentine Town Forest (E-18), and Crathern Land (C-27)**

Thick dashed line trails have been GPS'd using an accurate GNSS receiver. Thin dashed red trails are trails scaled from tax map or not yet GPS'd precisely.  
 Lines of small red circles = probable stone walls as seen in 2019-21 QL1 LIDAR data. Contours: 5', derived from 2019-21 LIDAR. Wetlands & Ponds: NWIplusNH 2017. Roads: NH DOT 2021.  
 Parcel lines (approx.) & buildings (accurate) from 2017 NRPC. NOTE: Mason parcels extend too far West; Greenville parcels too far East. Stone walls can be a guide to actual locations.  
 Town Line: Thick dashed red line is T/L according to USGS topos; thin green dashed line connects accurately located T/L monuments (and matches recent precise parcel surveys)  
 Parcel background colors: Light green: Conservation or Town Forest; Yellow: other town lands; Dark green: State forest; White: private lands; diagonal green in Greenville: Greenville conservation.  
 Trail colors Red, Blue, Yellow Purple as flagged; Green=no assigned colors. "XXX" indicates where trail continuation would trespass on Mason or Greenville non-conservation lands.  
 Map projection: EPSG:3614 "NAD83(NSRS2007) / New Hampshire (ftUS)". GPS grid: WGS 84 0.001° increments (≈ 360/267' in Lat/Long).
